Thirst isn't a water problem. It's a **deficit problem**.

Modern life depletes the four things the body runs on – electrolytes, clean energy, focus and recovery. Today the consumer patches the gap with three or four products that each solve only one part.

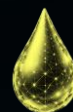

So they end up **buying a whole stack** – and **still crash**.

THRSTTM
FUNCTIONAL DRINK
[HYDRATION + FOCUS + PERFORMANCE]

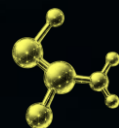

Energy drinks

caffeine — then a crash

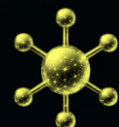

Hydration mixes

electrolytes, nothing else

Ketone shots (Ketone-IQ)

harsh taste, ~\$5, no caffeine

Creatine

stuck in a tub of powder

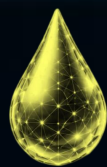

Four billion-dollar categories are colliding.

ENERGY
